

Ești un tânăr engineer, proaspăt absolvent de la **Facultatea de Electronică, Telecomunicații și Tehnologia Informației**, și ti-ar placea sa lucrezi pe un proiect mare de cyber security?

TenarisSilcotub caută un coleg nou în echipa de infrastructură care va lucra cu profesioniști din Italia și Romania la virtualizarea a 100 de servere SQL Microsoft, pentru a înlocui actualele servere fizice de producție.

Te invit să urmărești clip-ul de mai jos, în care îți prezint de ce un job de infrastructură prin **Programul Global Trainee (GTP)** este alegerea potrivită pentru tine, o carieră într-o companie industrială de top:

## **Junior IT Infrastructure implementation analyst**

**Location:** Zalau

**Purpose:** The new team member will take part in a large cyber security transformation project in which we will create more than 100 virtual servers that will replace the current production physical servers..

**Department:** IT Infrastructure & Operations

Are you a resourceful IT infrastructure enthusiast? Then, we want to make you one of us! If you get here, it is clear that you have knowledge about Windows Servers and Vmware Vcentre. You are also **technically skillful** in Microsoft SQL Server, Vmware vSAN, Esxi, Unity, Purestorage and docker.

Let us give you a few about us. We have a pleasant work environment and we strive as a team. We provide continuous feedback and together we establish the right career & development plan for you.

We also reward your implication and results. We care about your well-being, hence why we offer a variety of flexible benefits.

### **What do we give you in return?**

This “**IT Infrastructure**” role is part of the **Global Trainee Program** - the ideal job for graduates to kick start their career in engineering. It offers professional development and real life experience within the leading multinational company in seamless pipes.

During this complex development cycle of 2 years, you will go through the following phases:

- Experience in 2 departments over the course of the program
- 2 weeks in Argentina (Induction Camp)
- E-learnings, on the job training and other specialized courses
- Multicultural and diverse environment

### **A flexible package of benefits:**

- Flexible working environment (Short Friday/Late Monday)
- MyFlexiBenefits - personalized benefits for you and your family members)
- Fixed bonuses for Easter, Christmas, Holiday and Metallurgist Day
- Performance based salary increase
- Relocation Package
- Transport settlement
- 24 days annual leave + 1 day for medical analysis

### **What will you do in your day-to-day job**

- You will ensure the implementation of a stable IT infrastructure supervising operations before and after implementation.
- You will deliver the service levels agreed upon technically assisting in the resolution of incidents, attending to scheduled changes, providing support shifts adapted to a schedule.

- You will carry out the Process Improvement implementation developed by the Technology Department.
- You will ensure an adequate level of security and update, setting up and maintaining operating system and software.
