Ilmenau, 7. Juni 2017

First place and winner of the “h & s completion 2017” in Suceava

Dear students and supervisors of the hard and soft competition 2017,

dear winners!

I send you my respect and many congratulations for the first place of the hard and soft competition 2017 in Suceava.

Unfortunately I was not able to join the competition as I usually do every year but my team and the Ilmenau supervisors told me about the challenges to equip a bicycle with many sensors and technical stuff to detect and “catch” electronic values and reflections from the electronic devices. The creativity is always impressive to me how student teams find solutions and applications to the given tasks by the jury. Of course I watched the youtube video published by the organizers with the interesting demonstrations and interviews. Really – I am fascinated and deeply impressed and this encourages me to come again next year to attend this beautiful and remarkable event in Suceava. The place is worth going and your teams are worth watching as well.

You were the best and the winner of 2017 – my congratulations and I trust you will go on this successful way and prepare again for the upcoming event of 15th anniversary next year – the same time the same place!

Hope to see you again and good luck and as a friend of this completion I am very proud of this outcome and your special success!

Warmest regards from Ilmenau
